

Technical Data

Power supply	120 V / 50-60 Hz
Power input max.	1000 VA
Stand-by function	100 W/h
Protection according to IEC 601-1	Class I, Type B
MDD / MPG	Class IIa
Treatment tube length	6 ft 180 cm
Housing dimensions	H 25" / W 13" / L 23" H 65 cm / W 33,5 cm / L 600 cm
Weight	75 lbs 35,5 kg
Air flow	9 levels, ~ 1300 l / min
Air Temp. at evaporator	-20° C

Options

Articulating arm

Adapter

D33 Treatment hose

Wheel with brake

Federal law restricts this device to sale by or on the order of a physician.

The Skin Cooling System for Laser and Dermatological Treatments

CryoMini

- Cold Air Skin Cooling -
- Standby mode - permits instant user operation
 - Immediate cooling available for patient treatment
 - 9 fan speeds ensure optimum airflow selection

Enhanced patient comfort
Cost efficient – no consumables
Compact – small footprint
Lightweight – easily transportable

The CryoMini Cold Air Device is intended to minimize pain and thermal injury during laser and dermatological treatments and for temporary topical anesthetic relief for injections.

Patient Satisfaction

Simultaneous application of cold air in conjunction with laser and dermatological treatments leads to a distinct reduction in pain and may reduce thermal tissue damage. Various studies have indicated that longer treatment sessions may be possible due to increased patient comfort. Additionally, cold air has been favored as a successful method for providing local anaesthesia prior to injections.

Versatility

A major advantage of the CryoMini's non-contact skin cooling is that skin can be cooled before, during and after most treatments, without interfering with the laser application or requiring additional prep time.

Easy Operation

The touch screen ensures ease of operations. One button start up. You may change the 9 speed fan to accommodate patients requirements. Adjust treatment time at the push of a button.

Quick and Efficient Application

The cold air can be more selectively directed onto localized treatment areas by utilizing the laser handpiece adapter. An optional support arm is available to gently hold and guide the air tube to provide the operator with hands-free operation. CryoMini requires only normal room air, which is filtered and chilled to -10°C . There are no consumables or additional costs. The customized glass plate provides a compact location for various accessories, IPL laser systems, or smoke evacuator.
