

M Series

M Series

Ideal for the treatment of photo-responsive conditions of the hands and feet, the M Series is a versatile and powerful device suitable for office or home treatments.

Daavlin[®]
Let's Be Clear

M Series

Designed for effective and efficient treatment of the hands or feet, the M Series is a versatile unit for clinical and home use. The hood can also be removed and the unit turned on end for treatment of small, localized areas.

- 1 Accommodates a variety of lamp types, including Narrowband UVB, Broadband UVB and UVA. Combination units are also available.
- 2 Daavlin's ClearLink™ touch-screen controller is easy to use and ensures that each treatment is delivered safely and effectively.
- 3 Treatment times are surprisingly short, a result of power boosting components combined with U-shaped lamps that provide the power of two lamps in the space of one.
- 4 A specially designed cart allows patients to treat hands and feet simultaneously (*sold separately*).
