

NEW! Sapphire Windows for GentleLase & GentleYAG. Maximize Results. Save Money.

Save money on consumables and maintenance.
Sapphire Windows protect your valuable optics.

With Candela Pro Series™ 755/1064 nm Sapphire Windows, you can treat patients with fewer interruptions—and lower your operating costs overall. This new kit delivers proven sapphire window technology for improved performance:

- Compatible with GentleYAG and GentleLase Systems
- Easier to clean than glass windows
- Resistant to pitting and other optical damage
- Up to 5 times more durable than other windows
- Lasts from 2x to 5x longer than regular windows

"Sapphire Windows cost a little more than single wavelength glass, but **they help you save money on consumables and maintenance** in the long run. They are **easy to clean, they last longer and they give you better transmission for better treatments.**"

Christian Karavolas, Romeo & Juliette Laser Hair Removal
